This material has not been reviewed by the Securities and Futures Commission.

#### Investment objective

The fund aims to provide long-term capital appreciation by investing in a diversified portfolio of equity securities of companies in different industry sectors whose primary business focus is in the China region.

#### Manager's Comments

The pace of capital outflow in China equities subsided in February, although major equity indices in the region still reported a decline of between 2% and 3% month-on-month. The fund's portfolio was resilient as certain portion of our investments had been in shares that were being privatized by their respective controlling shareholders.

During the month under review, no major portfolio action was taken as the overall portfolio holdings were trading in our view at rather depressed valuations and ought not be disposed of at a discount. Meanwhile, we looked forward to combing the upcoming FY2015 financial results of listed companies for clues about their outlook and effecting any portfolio reshuffling, if necessary.

As of 29 February, the fund was 79.86% invested in Hong Kong-listed equities, 4.88% in China B shares and 9.19% in US-listed ADRs.
